

Einstein, 76, At Princeton

Noted Scientist Suffered From Gall Bladder Trouble

Princeton, N. J. — (AP) — World-Famous Scientist Albert Einstein died at 1:15 a. m. Monday at Princeton hospital.

Einstein, who was 76, had been admitted at noon Friday. The hospital said cause of death was inflammation of the gall bladder.

Einstein, who had secluded himself from public contact in recent years, had been attached to the Institute for Advanced Study here.

The quiet, unpretentious wizard of mathematics and physics spent his lifetime searching for a unified mathematical concept of the laws that govern the universe.

Fourth Dimension.

He was swept to international fame by the theory of relativity which he devised at the age of 26. His revolutionary idea, it added a fourth dimension, time, to the trio — length, breadth and width — which had formed man's basic knowledge of the measurement of matter. It also astounded scientists by disputing Newton's law of gravitation.

It was Einstein's disclosure, many years ago, that a small quantity of matter could produce astronomical

quantities of energy, which was so spectacularly proved when the first atomic bomb exploded.

But the famous, white-haired scientist looked upon the A-bomb with misgivings.

In 1945, shortly after the dropping of the bomb on Hiroshima, he commented: "At present atomic energy is not a boon to mankind, but a menace."

To U. S. in 1933.

He saw one hope, however, that "It may intimidate the human race to bring order into its international affairs, which, without pressure of fear, it undoubtedly would not do."

He came to Princeton as a lifetime member of the institute in 1933, a voluntary exile from his native Germany, where the Nazis listed him as "an enemy of the state." In 1940 he became a citizen of the United States.

In recent years, Einstein took stands on issues far removed from the realm of theoretical physics. He said he was compelled to do so by his "passionate sense of social justice and social responsibility."

The famous professor was granted the Wendell Willkie "One World award for 1948 "because he gave the world more than a new conception of the cosmos."

Led Modest Life.

The life of this amazing intellectual giant was simple and modest. His disdain for personal glory and material gain were almost a legend. His baggy-clad figure, a pipe perpetually in his mouth, and his long shaggy white hair and moustache, made him instantly recognizable almost anywhere in the world.

In his leisure Einstein loved to play the violin and to go sailing.

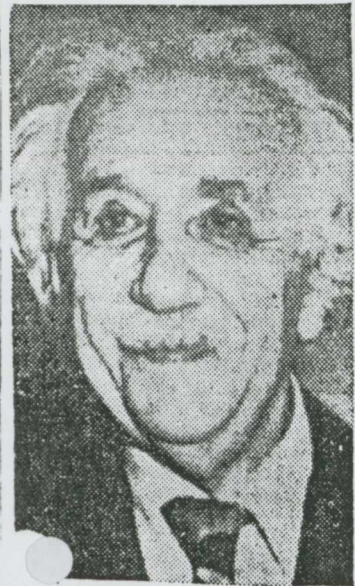

A review of Einstein's life is on page 14.

Slout Funeral To Be Held Friday

(Special to The State Journal)

VERMONTVILLE, April 14 — Services for L. Verne Slout, veteran showman of 40 years, will be held Friday at 2:30 p. m. from the Methodist church in Vermontville. Burial will be in the Kalama cemetery, where graveside services will be under the auspices of Vermontville Lodge No. 232, Free and Accepted Masons, of which he was a member.

Mr. Slout also held memberships in the DeWitt Clinton consistory, the Saladin Temple Shrine, Childs-Demaray American Legion Post No. 222, the Showman's League of America and the International Platform association.

ALBERT EINSTEIN.
